

I'm Dreaming of a GREEN AND SLIMY Christmas

Toledo hit national headlines this year with an algae bloom that made its water supply undrinkable. But Santa finds uses for the algae!

Algae makes festive wassail
— just don't drink it!

Mold the algae into liquid-filled ornaments. Splash!

It's great for shopping — a
dried, pressed sheet of algae
looks like money!

Looks fake
to *me*.

It's the
new security
features ...

Happy Holidays!

The algae sure
makes Toledo easy
to find!

Disclaimer! Algae only bloom in the summer.
The water's safe to drink now.
